EXPERIENCE

UCI Video Game Development Club - Programmer

Jan 2024 - Dec 2024

- Contributed to collaborative game development projects using Unity and C#
- Worked closely with designers and artists to implement gameplay mechanics and user interactions
- Participated in regular code reviews and sprint planning sessions to keep projects consistent and teams aligned

TECHNICAL SKILLS

Languages: C#, C/C++, Java, Python, SQL, JavaScript, HTML/CSS

Technology: Unity, Git, Trello, Node.js, Express.js, React, Flask, Bootstrap

PROJECTS

Lunar Umbra - C#, Unity

Aug 2025 - Sep 2025

- Contributed to a team of 18 to design and develop a 2D roguelike top-down tower defense game for Magical Girl Game Jam #12
- Led the programming team, implementing core systems for card-based unit placement, enemy wave spawning, and battle phase management
- Developed a scalable, data-driven architecture using Scriptable Objects for cards, spells, companions, and units

Bobert's Mad Dash to the Silly and Whimsy Factory - C#, Unity

Jul 2025 - Aug 2025

- Contributed to a team of 14 to design and develop a 3D skateboarding game submitted to the Gameplay First game jam
- Implemented a combo input system using a tree-like structure that maps input sequences to trick animations
- Handled animation timing and input buffering, ensuring only valid inputs during appropriate animation windows would trigger new tricks or combos

Red Goes Fasta! - C#, Unity

Jan 2024 - Mar 2024

- Contributed to a team of 4 to design and develop a 2D top-down racing game using Unity and C#
- Implemented AI-controlled cars to simulate competitive racing against players
- Scripted core gameplay mechanics including acceleration, drifting, and shooting
- Conducted playtesting sessions to identify and document bugs, contributing to iterative improvements in game balance and performance

EDUCATION

University of California, Irvine - B.S. Computer Science

Sep 2022 - Dec 2024

- Minor: Informatics
- GPA: 3.846
